	    ○ *MyA******Pass*****		

Labels	*FunctionalTesting, ManualTesting, AutomationTesting*	**Team**	*Team A* Pipedrive*
Description			

If you resize the browser window, the items do not rearrange and make it difficult to interact with them.

Steps to reproduce:
1. Login into the Website.
2. Resize the browser window, diagonally/vertically/horizontally, until you see the elements from navbar and left bar are no longer interactive.

Actual result: The site is not responsive and I am not able to interact with the elements.
Expected result: The user should see the site responsive and able to interact with the elements.

See the video evidence attached here.

Suggestions:
1. Make the site fully responsive if someone resizes the window.
2. If the window is resized, with no responsive styles, I will suggest to use vertical and horizontal scroll bars to continue interacting with the elements.

Product	Pipedrive portal		
Title	Phone field accepts any string		
Details			
Type	Bug	Sprint	Sprint 0
Priority	Medium	Status	Open
Feature	Deal, Lead, Contacts-People	Reporter	Armando Cifuentes Gonzalez
Build version	Pipe1.0.0	Assignee	Armando Cifuentes González

Environment	• Account used

Description			

Is it possible to save an item with an invalid phone number.

Steps to reproduce:
1. Login into the Website.
2. In the Leads page, click on + Lead button
3. Fill the fields with the following data. -
    a. Contact person: Freddy Mercury
    b. Organization: Queen
    c. Title: Queen lead
    d. Value: 123000000.00/Pound Sterling (GBP).
    e. Phone: MyAwesome PhoneNum ber
4. Click on Save

Actual result: The data is saved with the invalid phone number.
Expected result: There should be a warning message in the field, like in the email field, before saving the data.

See the video evidence attached here.

Repeat the same steps for the Deal and Contacts-People pages.

Suggestions:
1. Add a regex validation for the phone number field
    a. If the phone number is international, I will suggest to put beside the phone number field a dropdown field where the user can select the country code of the phone number.
2. Put a placeholder in the phone number to suggest to the user how the data should be entered

Title	Warning modal for delete is not designed according to the wireframe proposed		
Details			
Type	Bug	Sprint	Sprint 0
Priority	Low	Status	Open
Feature	Deal, Contacts-People	Reporter	Armando Cifuentes Gonzalez
Build version	Pipe1.0.0	Assignee	Armando Cifuentes González

Environment	• Account used
	    ○ armandocifuentes_007@hotmail.com
	    ○ MyA******Pass*****		

Labels	FunctionalTesting, ManualTesting, AutomationTesting	Team	Team A* Pipedrive
Description			

The warning modal to delete an item (People, Deal) is not designed according to the wireframe proposed. Instead of an aesthetic modal, it appears a browser native modal.

Steps to reproduce:
1. Login into the Website.
2. In the Deals page, click on + Deal button and create a new item. Or, click on an existing item in the board.
3. Open the existing item, or the one you created.
4. Click on the Settings icon button and then click on the Delete option

Actual result: The browser native modal appears instead of an aesthetic modal using the design proposed by the UI/UX Design team.

Expected result: The modal should look like to the proposed wireframe create by the UI/UX Design team.

See the video evidence attached here.

Repeat the same steps for the Contacts-People page.

Product	Pipedrive portal		
Title	Expected Close Date field accepts unsupported formats		
Details			
Type	*Bug*	**Sprint**	*Sprint 0*
Priority	*Medium*	**Status**	*Open*
Feature	*Web portal*	**Reporter**	*Armando Cifuentes Gonzalez*
Build version	*Pipe1.0.0*	**Assignee**	*Armando Cifuentes González*

Environment	*Demo version. -*
	• *Account used*
	   ○ *armandocifuentes_007@hotmail.com*
	   ○ *MyA******Pass*****￼*		

Labels	*FunctionalTesting, ManualTesting, AutomationTesting*	**Team**	*Team A* Pipedrive*
Description			

The field accepts values that should not be supported by it.

Steps to reproduce:
1. Login into the Website.
2. In the Deals page, click on + Deal button and create a new item.
3. In the Expected Close Date type the following: 1212121212. Then click in another part of the modal.

Actual result: The error message does not appear.
Expected result: The error message for an unexpected value should appear.

See the video evidence attached here.

Suggestions:

The following suggestions are not related with the bug per se, but came to my mind when I was checking the field:

1. Right now, is possible to set any date in the field, also dates prior to the current date. Since the label says "Expected", I will expect to save dates after the current date. My suggestion is to only enable the dates after the current one and disable the past ones in the datepicker.
